TilliT Access Control

TilliT is a purpose-built maritime access control system designed to deliver secure, seamless access for passengers and crew across all onboard areas. By combining RFID, mobile credentials, and advanced new capabilities, TilliT ensures smooth daily operations on cruise ships, ferries, and offshore vessels.

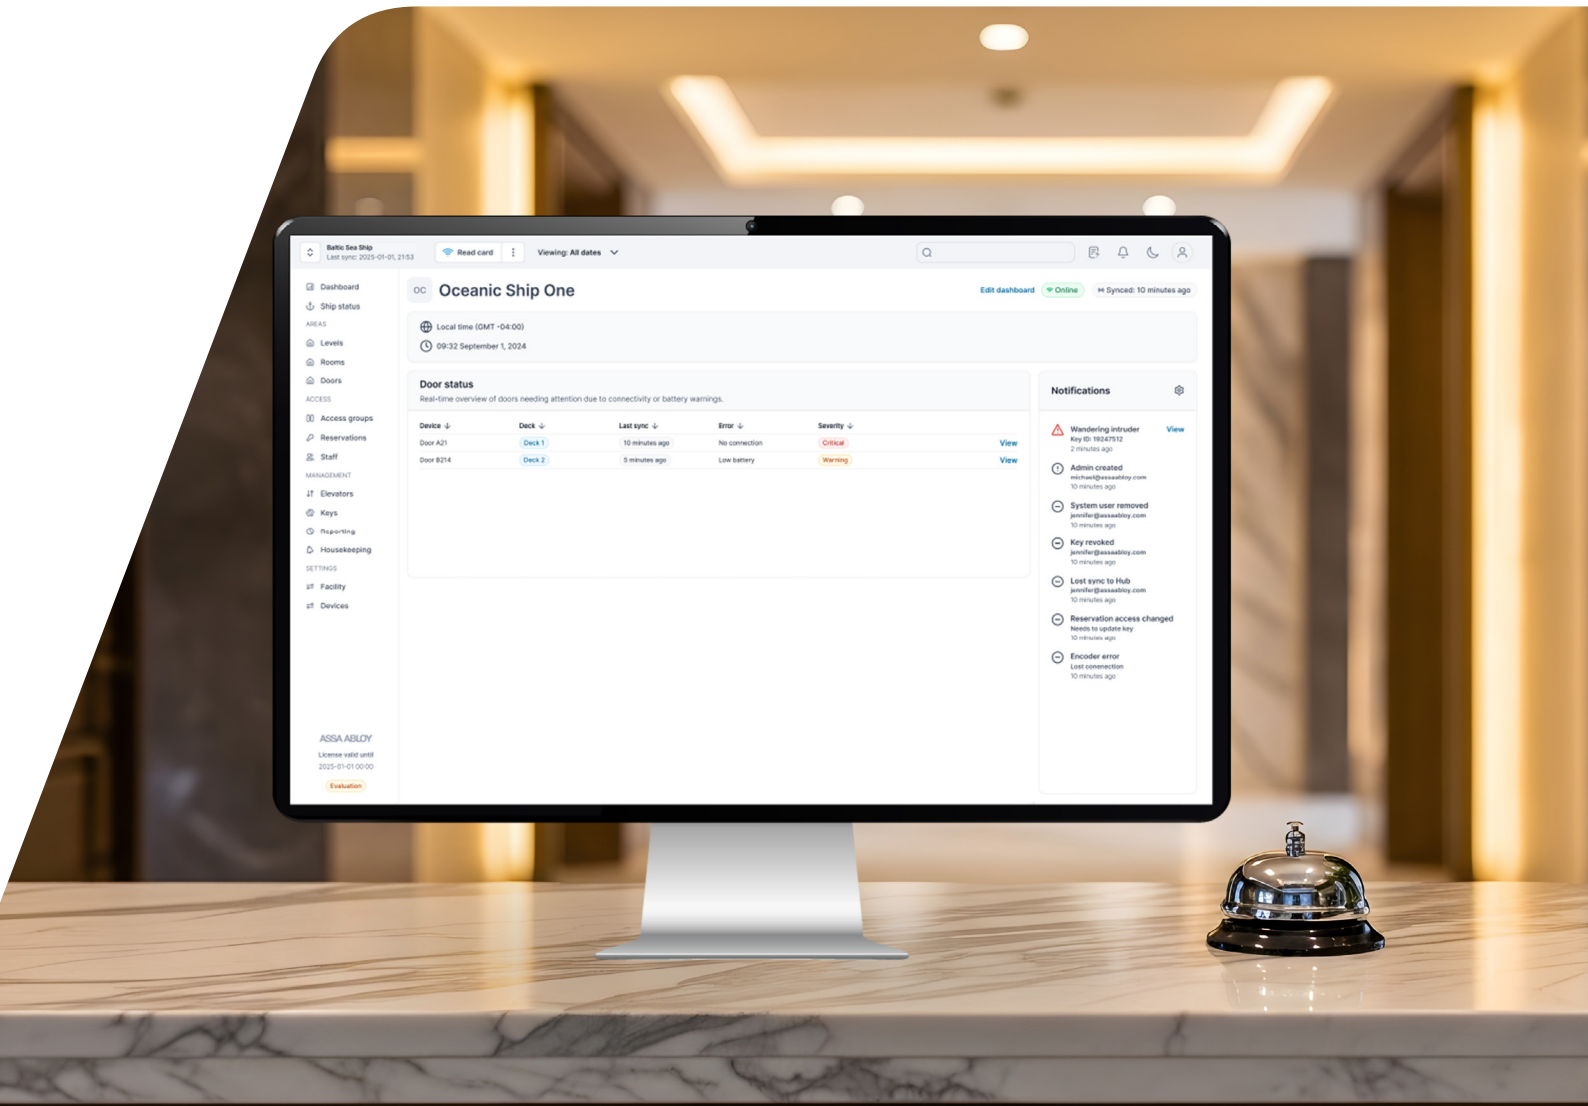

Built on a modern two-part architecture, TilliT provides robust onboard access control alongside fleet-wide management from shore. Its intuitive web interface, connected-lock functionality, and flexible integration options enable efficient, transparent, and future-ready access management across your entire fleet.

Fleet Management combined with On Premise Access Control

- Two-part onboard/shore solution (Bridge & Hub)
- Fully operational offline onboard, with seamless synchronization to land once connected

Hardware support

- Adorn ID100
- Vingcard Essence
- Vingcard Signature
- Vingcard Classic Upgrade
- Vingcard Flex
- Vingcard Elevator Controller
- Vingcard Remote Controller
- Orbi Network Encoder
- Vingcard RFID Encoder
- MELI-E Ethernet Lock Interface
- ELI Vingcard Ethernet Lock Interface
- Vingcard RS485 Gateway (V1, V2)

Improved access control

- Enhanced access control with easily tailored access rights for each guest or crew member
- Create keys and permissions from shore even without a live ship connection to speed up turnaround
- Areas and access groups simplify management and allow quick, fleet-wide adjustments

Flexible Integrations

- Connect quickly to existing systems using full REST APIs and OpenID Connect
- Integrate an entire fleet through a single integration point
- Modern Docker- and Kubernetes-based deployment

Connected locks

- Reduce reception workload with encode-at-door functionality and remote cabin moves
- Prevent issues with real-time door status, diagnostic events, and predictive battery alerts
- Enable live use cases such as evacuation tracking and more
